DETAILED ACTION

Applicant's election of Invention Group I, Claims 1-3, in response to the restriction requirement mailed August 24, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). **Claims 9-16** are cancelled. **Claims 1-8** are pending. **Claims 4-8** are withdrawn. **Claims 1-3** are presently under examination.

Priority

The current application filed on November 11, 2003 claims priority to provisional application 60/429, 237 filed on November 26, 2002.

Information Disclosure Statement

The IDS filed June 01, 2004 has been received and is signed and considered, a copy of the PTO 1449 is attached to the following document.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-3 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The polypeptide as claimed, has an amino acid sequence duplicative of that of the protein comprising an amino acid sequence designated as SEQ ID NO: 2 or the cellular precursor thereof and possesses the

Art Unit: 1653

biological and functional properties of the naturally occurring polypeptide intemedin and therefore does not constitute patentable subject matter absent recitation of "isolated and purified" in the preamble.

See *American Wood v. Fiber Disintegrating Co.*, 90 U. S. 566 (1974); *American Fruit Growers v. Brogdex Co.*, 283 U. S. 1 (1931); *Funk Brothers Seed Co. v. Kalo Inoculant*, 33 U. S. 127 (1948); and *Diamond v. Chakrabarty*, 206 USPQ 193 (1980).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by Roh et al. (NCBI Direct submission Accession Number AF529213). Roh et al. disclose a polypeptide comprising an amino acid sequence that is 100% identical to the amino acid sequence designated as SEQ ID NO: 2. Thus Roh et al. teach all the elements of **claims 1-3** and these claims are anticipated under 35 USC 102(b).

Conclusion

No claims are allowed.
